

Save More Than \$600 A Year

* based on 1.5 Gbps home internet service in the GTA

Get Affordable High-Speed Internet.

High-Speed Internet Should Be Accessible & Affordable For Every Household.

At **KOL LEK TIV**, we believe that high-speed internet should be accessible and affordable for every household. By harnessing the power of collective bargaining, we ensure fair access for all. When residents of apartment buildings and condos come together, we create a strong collective voice that drives down prices and boosts service quality.

Transparent & Impartial, Always.

We act solely in the best interests of unit owners and tenants, not the ISPs. Our fully transparent 'blind bid' system ensures fair competition among ISPs, leading to genuine savings and enhanced service quality. No hidden fees, no fine print—just straightforward savings for your residents.
